The Insurance Centre

Drew is a testament to his profession as an insurance adviser.

I asked Drew if he could sort out my public liability and employers liability too, he gave me a quote very promptly, but then I changed the scope of the employers coverage because I am taking on another full time engineer in a couple of weeks.

For those old enough to remember, years ago we all used to have a weekly visit from the "man from the Pru", he would come to your house a sort out all your insurance details, he got to know his clients, he understood what they were looking for and need, without loads of awkward questions and ones you don't understand. Drew is like that, NO NONSENSE.

He knew exactly what I needed, I only had to give the minimum of minor details and it was done...No Fuss.. and what's more the policy he provided with the additional engineer worked out to be a better deal.

I would highly recommend Drew and The Insurance Centre and I intend to pass more of my insurance his way in the future.
